Que. 3 Read the paragraph carefully and answer the questions given below: 05

The rapid evolution of science and technology in the 21st century has shifted from being a mere tool for convenience to a fundamental component of human existence. Digital technologies have interwoven themselves into daily activities, transforming how societies work, communicate, and perceive the world. Advancements in biotechnology have allowed for breakthroughs in medicine, significantly improving quality of life and increasing life

expectancy. Simultaneously, renewable energy technologies, such as solar panels and wind turbines, are crucial in addressing climate change.

However, this accelerated progress is not without drawbacks. The automation of labour, while increasing efficiency, raises concerns about job displacement and the widening of socioeconomic gaps. Furthermore, in the digital age, cybersecurity threats have become pervasive, with hackers able to compromise personal information and critical infrastructure.

As scientific advancements continue at a breathless pace, society faces the challenge of managing the environmental impact and ethical implications of innovations like artificial intelligence and genetic engineering. Therefore, the future depends on a balanced approach that maximizes benefits while mitigating risks.

Questions:

1. According to the passage, how have digital technologies changed our way of life ?
2. What is one major positive impact of biotechnology mentioned in the text ?
3. What is the "dual edge" or, conversely, a major challenge of automation described in the text ?
4. What is the main risk associated with the "connected" nature of our world according to the passage ?
5. Give a suitable title to the passage.
