- xii) Did he finish his homework yesterday ?(do, did, had)

Que:3 Read the following passage carefully and answer the questions that follow.
(10)

One major problem that faces the world today is the rapid growth of population, often referred to as population explosion. Until about 800 AD the world's population stayed below 200 million. Since then it has risen dramatically. The rise has been the greatest in the 20th century. The population has recently risen to about six billion : it is three times as large as it was in 1960. It is not so much the actual population as its rate of increase that is alarming. Experts predict that by 2025 there will be about eight billion people, causing serious problems of hunger, overcrowding and environmental pollution. With a population of more than 1 billion, India is the second most populous country in the world.

Questions:

- 1) Which term best describes the problem we face ?
- 2) How much is the population of world today ?
- 3) What is alarming ? Why ?
- 4) How much is the population of India ?
- 5) Suggest a suitable title for the passage.?
